Neurology Grand Rounds
Fall 2010

Dr. Neda Bernasconi
Assistant Professor, Dept. of Neurology and Neurosurgery
McGill University

“A Short History of Magnetic Resonance Imaging of Temporal Lobe Epilepsy”

Objectives - Discuss how advanced MRI imaging acquisition and processing techniques help in:

1) Determining the localization and pattern of structural damage

2) Assessing consequences of drug-resistant seizures

3) Detect network pathology

Wednesday October 27, 2010
8:30 a.m. - 9:30 a.m.
De Grandpré Communications Centre
Montreal Neurological Institute

A light breakfast will be served
