

GRAPHOS

1-Credit Course on Science
Communication

- Course on science communication at the graduate level

For graduate students and postdocs interested in developing science communication skills, Graphos continues to offer **CCOM 614: Communicating Science to the Public**. This is a [1-credit pass/fail course](#) designed to help students practice translating their research findings into readily understood explanations for non-specialists. Engaging in both written and oral assignments, students will develop greater audience awareness and hone skills to frame research and engage narratives. Building these communicative skills will help students contribute more effectively to public conversations related to their discipline.

[Communicating Science to the Public \(CCOM 614\) - REMOTE](#)

CCOM 614-701 (CRN 19088): Wednesdays, 10:05-11:25 (January 6 to March 17)

CCOM 614-702 (CRN 20675): Wednesdays, 13:05-14:25 (January 6 to March 17)

Registration to be completed in [Minerva](#).

Dr. Diane Dechief, coordinator for CCOM 614, would be happy to answer questions about these courses: diane.dechief@mcgill.ca.
